

The Inward Bound Institute Proposal

“Touching Reality” Series

The Situation

“What happens when we die?” “Is there a Jewish afterlife?” “If I had known this was Judaism, I wouldn’t have spent so many years studying other religions.” “Now I know how to relate to my children.” These are thoughts and feelings expressed by hundreds of students who study with Rabbi Yehuda Shemtov, director of the Glazer Center in Yardley, Pa. There is an imminent, dramatic need for a richer understanding of one’s spiritual nature, voiced not only in the Jewish community but by individuals throughout the world.

For many years, Rabbi Shemtov has been on the cutting edge of innovative educational programming, and has successfully reached out to many Jews and non-Jews throughout the country. His thinking and educational programs are founded on a unique Jewish philosophical framework and a contemporary approach to understanding and appreciating the values of Torah. He draws from ancient Kabbalistic sources, while using modern practical learning applications, such as self-discovery, accelerative learning, and emotional intelligence, giving him the ability to follow in the footsteps and teachings of the Chassidic masters who preceded him.

Through his work, many have been introduced to the beauty and depth of Judaism and its teachings in a non-threatening and exciting manner. As a result, both religious and non-practicing Jews, as well as non-Jews, are able to develop a better understanding of themselves and their relationship with G-d. Rabbi Shemtov empowers us with the inspiration and impetus to live and spread this life message of goodness and joy. This is what naturally leads people back to G-d so that they can fulfill their own unique purpose.

Toward that end, Rabbi Shemtov is spearheading this project and seeks financial partners to underwrite a series of world-wide programs that will share the teachings of Chassidic tradition and the Kabbalah, while utilizing a new learning methodology. This methodology allows participants to rediscover their inner
