

The Model for Change

Step 1 Whether it is prompted internally or externally, you **recognize the need** to change, to leave what you are familiar with—the status quo. The decision needs a clear vision, strong intention and support to carry it through.

Step 2 Your inner **resistance** to the change hits! You desire to go back to what you know. In order for resistance to occur, there must be an equal balance of order and chaos. Order represents the familiar—what was; chaos represents the new—the unknown.

Step 3 The interaction of order and chaos creates immense **agitation**. Order and chaos are neither wrong nor right and both are necessary for the change to occur. Likewise, the agitation is neither good nor bad.

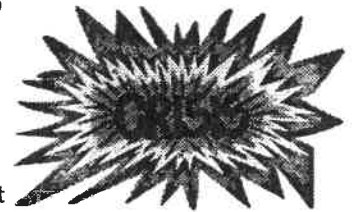

Step 4 If the agitation gets strong enough, something has to give. You move to a **choice point**—you will go one way or the other.

Step 5 Choosing the past does not work. If the past was workable there would be no need to change in the first place.

Choosing the past results in **illusion**, a self-deception. You either deceive yourself into thinking that the change was not necessary, or that you have already achieved it. Self-deception eventually erodes your self-esteem.

Step 6 When you consistently choose illusion, you often cannot see what you are doing. You create a **crisis** which can wake you up to the change you need to make. The crisis can be ignored, which leads eventually to demise; or, it can shake you up enough to recommit to the change, and mean it this time.

Step 7 The other option is to risk the unknown and do something new; to stay with your intention to change. This choice throws us into the **chaos of creation**. "Chaos" because you are pulled in opposite directions—you are in paradox, maintaining two seemingly opposite experiences at once. "Creation," because when you are in the unknown, you have the space to choose new behaviors. You need to learn to be able to simultaneously acknowledge the past and create the future by staying with your decision to change.

Step 8 Chaos is extremely uncomfortable and leads to another **choice point**. At this point, strong intention and support are critical! It is easy to lose sight of your vision and fool yourself. You need the support of people who know your intention and vision and who will help you stay on track.

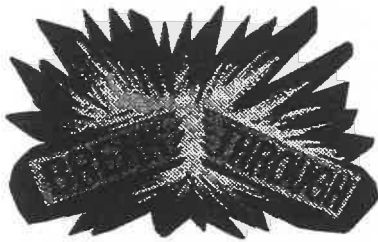

The Model For Change

Step 9

Staying in chaos is essential to shift to

the **new paradigm—personal freedom**. You are the source of your experience and are able to receive and use new information. You change the way you see. The same data means something different than it did before. You are able to discover new solutions to old problems. You demonstrate the **context of personal responsibility**.

Step 10 You are at a critical point because life doesn't feel, look, or seem familiar. It usually doesn't fit your pictures of how

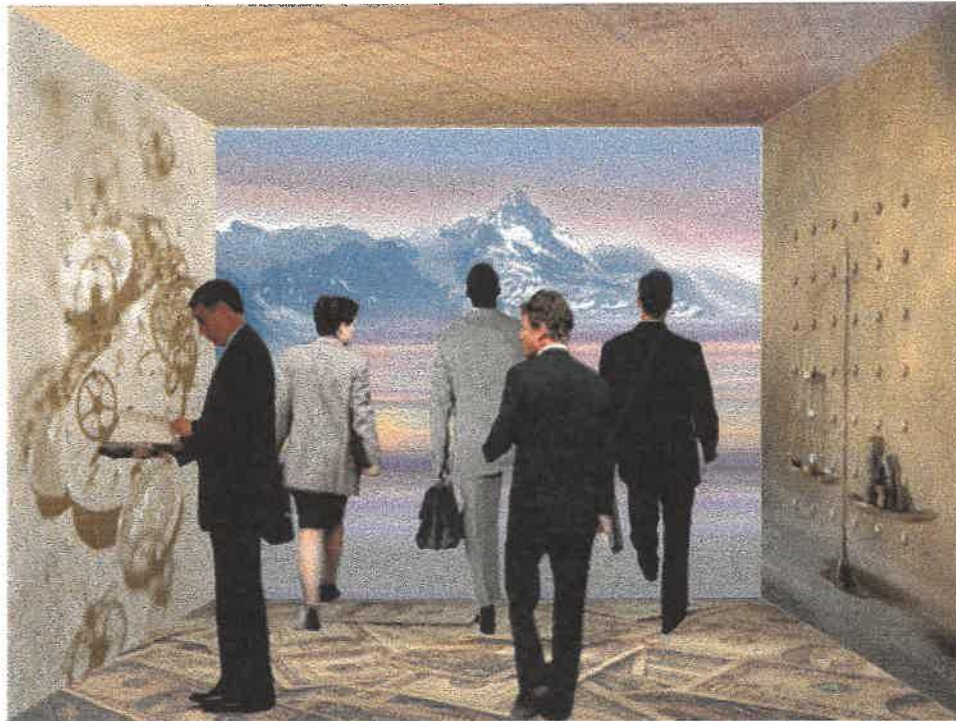

things are. At this point, you need to remember your decision and intention and stay **congruent**, using everything you have learned so far. It is okay that things don't look and feel as expected. If you continue to risk the unknown, you will have continued **breakthroughs** and will get closer and more connected to your vision.

The Model For Change provides the road map, empowering you to be proactive, rather than reactive, in dealing with change. With the help of clear intention, support, and synergy, you can successfully navigate through change. By using the model, you will distinguish real change from the illusion of change, saving precious time and energy.

The Model for Change[®] ***For Managers***

Program Overview

The Model for Change©

Program Overview

Audience

This two-day program is designed for managers (defined as those who manage others) of teams or organizations that are changing due to the decisions of management and/or external factors.

Why this Program is Different

Change is inevitable. When individuals understand the internal process of change, they can manage and communicate more effectively, and support others so they see change as an opportunity instead of fearing it. Most other change processes focus on the external aspects of change.

Program Foundations

1. Effective managers are able to demonstrate leadership and support others who are in the process of change up, down and across the organization.
2. Employees who understand their internal process of change are more effective at their jobs, because they are more successful in aligning themselves to the changes around them.
3. When employees in changing environments are successful in aligning themselves to change, their team or organization is more effective in achieving its goals.

Learning Objectives

Through participating in this training, managers will:

1. Take personal responsibility for aligning their vision and intention with the organization's change.
2. Consciously choose the environment they want to create, and provide leadership for others.
3. Clarify their own intention, vision and choices within the changing environment.
4. Recognize where they and others are in the change process.
5. Effectively manage, communicate and support the organization's desired change.

DAY ONE

Modules:	Time:
Opening Module	1 hour
The Model for Change Improvisation	2 hours
Debrief of Improvisation Activity	1.5 hours
Resistance and Choice	1.5 hours
Giving and Receiving Support	1.5 hours

DAY TWO

Modules:	Time:
Creating an Environment	2.5 hours
Getting Past Bias and Judgment	1 hour
The Essence of Communicating	3.5 hours
Taking Ownership for Change	1 hour

Day One

Opening Module

Module Overview

Time: 1 hour

Module Objective

- Participants discover the business case for leadership in an environment of change.

Sections

1. Enrollment
2. Introductions
3. Course Purpose, Methods, Outcomes and Agenda
4. “The Business of Paradigms”
5. Team Presentations

Content

- Video (10 minutes), “The Business of Paradigms”
- The Business Case for Leadership in an Environment of Change

Activity: “The Business of Paradigms”

Purpose of the Activity: In viewing the video and debriefing it, participants discover that habitual assumptions color thinking. They discover that managers today need to be flexible to continual change and open to shifting from old to new thinking.

They’ll experience:

- The business case for why their team or organization needs to change.
- Continual change is part of what they can expect.
- The impact of old versus new thinking can be significant.
- Change is a matter of choice.

Activity: Team Presentations

Purpose of the Activity: Participants in teams discuss the different paradigms in their lives and in business, how they have shifted paradigms, and what precipitated that. They consider causes and recognize that the patterns of paradigm shifting in their personal life and in business are the same. Each team creates a pattern of what is the same in what their team has experienced, and presents this pattern to the group.

They’ll experience:

- No matter whether change occurs in business or non-business settings, the pattern of shifting from old thinking to new thinking is the same.
- Change is a matter of choice.

Module Two: The Model for Change Improvisation

Module Overview

Time: 2 hours

Module Objectives:

- Teach the Model for Change.
- Create personal reflection on vision and intention.
- Bring the Model for Change to life by physically acting it out in an improvisation.

Sections:

1. The Model for Change
2. “What is My Vision?”
3. Model for Change Improvisation Activity

Content:

The Model for Change is a map of the change process that individuals experience. This model has 8 steps, which participants can use like a roadmap. The model gives participants a common language and understanding, which they can use to predict their own behavior and the behavior of others in change up, down and across the organization.

- **#1 Decision to Change:** A decision to change is made. In order to create successful change two elements are critical to the process: vision and intention.
- **#2 Resistance:** Resistance occurs when a decision to change has been made. Frequently, the decision to change and the resistance are equally balanced. This creates agitation.
- **#3 Choice Point:** This occurs when the agitation is strong enough. The old way of operating is experienced simultaneously with new ways of operating and new information. This precedes any change in behavior or new learning. Individuals are at a choice point to either choose the past or choose to go forward into the unknown.
- **#4 Illusion:** Being in illusion is choosing the past. This can be comfortable and familiar, and it always involves faulty thinking.
- **#5 Creating a Crisis:** If individuals choose the status quo, they eventually create a crisis. Choosing the past does not work—that’s why they made a decision to change. Crisis does not occur suddenly. Prior to any crisis there are many opportunities to choose the change. If the old behaviors are continued, there are

many signs that the situation is eroding. The purpose of the crisis is to wake individuals up, so they can be responsible and make the changes they have committed to.

- **#6 The Chaos of Creation:** If individuals choose the unknown, they move into the chaos of creation. Chaos is being open to new information while feeling uncomfortable and unsure. People learn and experience new information that was hidden and protected by their old patterns. At the same time they know and experience the familiar ways. They are now “in paradox”—experiencing two seeming opposites simultaneously. Paradox allows for conscious choice of new thinking and behavior. In creation people choose a new reality by the focus of their will. Another choice point occurs. Individuals can continue with their new choices or retreat again into old patterns. The support of peers and/or outside helpers is now critical.
- **#7 Responsibility:** People are the source of their experience. Individuals change the way they see. They change how they operate.
- **#8 Breakthrough:** As people continue, often another choice point occurs. Individuals often stop just short of the goal. Things are not as they pictured they would be. They hesitate. If people stay on course, they apply everything they have learned to break through into integrity and unimpaired ability. They are true to their vision and intention.

Activity: “What is My Vision?”

Purpose of the Activity: Vision includes personal vision and the organizational vision participants are trying to accomplish. Participants begin the process of reflecting on and committing to aligning their purpose with the vision of their team or organization.

Activity: Model for Change Improvisation Activity

Purpose of the Activity: Participants engage in a role-play of the elements of change which brings the Model for Change to life, demonstrates where they are in the change process, demonstrates the process others go through in change, and teaches the features of each step for future recognition.

They’ll experience:

- Change has a pattern, which can be understood.
- They can identify where they are in the model for change, and recognize the features of that location.
- They can predict the pattern of change that occurs for themselves and their employees, co-workers and senior managers.
- Change is a personal choice. No matter who initiates the change, what a person does about the change and how they go about it is up to them.

Module Three: Debrief the Improvisation Activity

Module Overview

Time: 1.5 hours

Module Objectives:

- Participants experience where they and others actually are in the change process.
- Participants experience the value of genuine connection in communication.

Sections:

1. Large Group Debrief
2. Team Discussion on Leadership During Change
3. Team Presentations

Content:

- The Model for Change
- Personal Responsibility

Activity: Large Group Debrief

Purpose of the Activity: By discussing their experience in the improvisation activity, participants recognize how their own behavior has affected others and why, and the value of giving and receiving support.

They'll experience:

- Resistance and choice are essential to the process of change.
- Today's choices are influenced by personal history and ingrained ways of behaving, thinking and feeling.
- The value of giving and receiving support in order to commit to vision and intention.

Activity: Team Presentations

Purpose of the Activity: Participants discuss in teams changes they have been through in their lives and past work situations, and how what they are learning applies to communicating and leading others in their current organization. They discuss how their behavior is patterned after their managers, and how their own behavior affects others up, down and across the organization. They present patterns they recognize to the larger group.

They'll experience:

- How a leader's behavior affects others up, down and across the organization.
- That how they are in the process of change will set the pattern for their teams.
- Teams always operate in the shadow of their leader.

Module Four: Resistance and Choice

Module Overview

Time: 1.5 hours

Module Objectives:

- Managers learn to recognize the difference between “resistance,” which comes from experiencing the tension of desiring the status quo and equally desiring to change, and “reaction,” which occurs when individuals respond in a “knee-jerk” way to a present situation based on their past experiences.
- Managers learn how to get out of reaction and choose to relate consciously with choice points in their experience of change.
- Managers begin to develop new behavioral options for avoiding roadblocks in the model for change, such as moving beyond resistance to the change, dealing with “knee-jerk” emotional responses, letting go of illusions about the change, and welcoming the tension between the old and the new.

Sections:

1. Resistance vs. Reaction
2. What is the Reactive Self?
3. How to Recognize and Get Out of Reaction
4. Choice Points and Being Proactive
5. “Tough Situations” Activity

Content:

- Teaching on cognitive dissonance and its role in learning. Being in paradox is essential to learning. Resistance is essential to the process of change.
- The Reactive Self. When individuals are “in reaction,” their responses are on automatic pilot. Their responses automatically reflect the ways they learned to act in the past when their feelings and thoughts were not okay with the people around them.
- Stop, Look, Listen, Act: A Tool for Getting Out of Reaction.
- Teaching on choice points and being proactive.

Activity: “Tough Situations” Activity

Purpose of the Activity: Participants practice using Stop, Look, Listen, Act in order to consciously choose behavior that is true to their vision and intention, and demonstrate that behavior to others. They revisit actual situations that have been difficult to deal with, and create different outcomes using the tools just taught.

They'll experience:

- Being in paradox and resistance
- Encountering their own reactions
- Getting to the core of their emotional responses
- Choosing to be proactive

Module Five: Giving and Receiving Support

Module Overview

Time: 1.5 hours

Module Objectives:

- Teach the process of giving and receiving support.
- Demonstrate that in order for the individual's change process to be successful (defined as realizing their vision and intention), support from others is essential.

Sections:

1. Teaching on Giving and Receiving Support
2. Slice of Life Demonstration
3. "Slice of Life" Activity

Content:

- Giving Support is a process for participants to use in supporting others who are in the process of change up, down and across the organization.
 - **Connect:** Create and maintain a personal connection with the other person. Regardless of whether the other person is an employee, peer or senior manager, this is the most important step.
 - **Know:** Know their intended change.
 - **Be Neutral:** Do not judge the other person.
 - **Be Compassionate:** Be able to empathize with their experience.
 - **Be Equal:** Tell them the truth of what you see from your own experience.
 - **Discover:** Ask questions and listen. The most important thing is to support the other person in discovering the next steps for themselves.
 - **Follow-up:** The individual is always responsible for their own choices. Individuals must be willing to respect the other person's decision, even if it's not the one they would choose. Following-up is an expression of respect. It also creates an opportunity to revisit the change process.
- Receiving Support is a process for participants to use in receiving support from others.
 - **Understand:** Be aware of your feelings. Understand feelings as data, as information.
 - **Welcome:** Welcome the learning experience.
 - **Choose:** Gain the clarity to choose a new outcome.
 - **Responsible:** Take responsibility for your results.

Activity: “Slice of Life” Activity

Purpose of the Activity: In the “Slice of Life” activity participants will learn giving and receiving support through a demonstration and then by individual practice, using real-life scenarios of giving and receiving support up, down and across the organization.

They’ll experience:

- Connecting with the other person is the most important step in giving support.
- Connecting with oneself is the most important step in receiving support.
- The value of genuine two-way communication in creating engagement and alignment during change.

Day Two

Module Six: Creating an Environment

Module Overview

Time: 2.5 hours

Module Objectives:

- Demonstrate that the way in which change is communicated creates an environment which influences the results achieved.
- Teach the 6 Tools for Communicating.

Sections:

1. Context versus Content
2. 6 Tools for Communicating
3. “Team Meeting” Activity

Content:

- Context versus Content. Context is the emotional and attitudinal environment that surrounds content and communicates meaning to the other person. Content is information.
- How the Environment Affects the Way People Feel or Behave
- How Information is Delivered and Received
- 6 Tools for Communicating
 - **Create Buy-In:** Buy-in is the process by which people take ownership. It begins with finding the words, questions or activities that get people interested in supporting a new idea or action. The outcome of buy-in is that the audience has taken ownership of the idea or action for their own reasons.
 - **Establish Common Ground:** The shared content or experiences that give one a sense of belonging to a team. Establishing common ground with others creates connection so that people become and stay involved in a shared goal.
 - **Ask Questions:** A process which allows the participant to gather real information from people rather than assume that they already know what they need to know. This process allows both parties to discover both the obvious and non-obvious truths about a situation.
 - **Listen:** The process of receiving information. It means remaining open and neutral to what is communicated, and not changing the information in

one's own mind as one receives it. Listening includes hearing words as well as hearing what's underneath the words.

- **Allow Discovery:** The listener is able to discover or uncover solutions or answers for themselves, rather than having them provided. This supports them to take responsibility for making a change. When people discover solutions for themselves, it helps them be committed to action.
- **Be Aware of the Level of Intensity of a Communication:** The degree of significance, challenge or risk that is involved for a person to participate in what they are being asked to do, and what results they will be personally responsible for producing.

Activity: Team Meeting

Purpose of the Activity: Participants practice using the communication tools they have just learned by planning and conducting a meeting dealing with change. In this meeting they discuss a change they are responsible for implementing to which there is resistance.

They'll experience:

- Planning a meeting
- Conducting the meeting
- Applying the communication tools to create buy-in and ownership in their listeners
- Giving and receiving support
- Creating an environment
- How the environment created around what is being communicated can powerfully affect how it is being received, and whether others are motivated to change.

Module Seven: Getting Past Bias and Judgment

Module Overview

Time: 1 hour

Module Objectives:

- Participants learn to assume positive intent in relating with an employee, peer or senior manager who seems difficult.
- Participants learn to address the underlying emotional sources of another's behavior, and thereby connect better with that person.

Sections:

1. Being Neutral - How Not to Take Things Personally
2. F.A.V.O.R.
3. "Getting to the Heart of the Matter" Activity

Content:

- Assuming Positive Intent.
- F.A.V.O.R (teaching on how to address the underlying emotional sources of another's behavior):
 - **Feel:** First, look inside. What are you feeling? What you are feeling is your clue to what the other is feeling, and how you should respond. Try to put yourself in their place, and try to determine the emotion that is the source of their behavior. Notice if you have any judgments or bias.
 - **Ask or Acknowledge:** Acknowledge the emotion in a non-threatening way. Ask a question to clarify, and confirm that you have received the same emotion that was sent to you by the other.
 - **Validate:** Validate the other. This doesn't mean you have to agree with them. You are simply letting them know that you understand their concern, without judgment.
 - **Open:** Open the space by including others, if there are any, in the conversation. This gives the other time to realize he or she is not alone, and time to reexamine their behavior and its implications.
 - **Return:** Return to the other person. Complete what was started. Relate your experience, knowledge or expertise, if applicable. Let the person discover the next step for themselves.

Activity: "Getting to the Heart of the Matter"

Purpose of the Activity: Participants practice role-plays with a difficult employee, peer or senior manager, using the content they've learned so far (the Model for Change, personal responsibility, SLIA, content vs. context, 6 Tools for Communicating, assuming positive intent, and F.A.V.O.R.) to overcome judgment and bias and connect with the other person.

They'll experience:

- Dealing with listeners who are having difficulty with change
- Overcoming their own judgment and bias
- Communicating in a way that opens communication and creates connection
- Giving and receiving support

Module Eight: The Essence of Communicating

Module Overview

Time: 3.5 hours

Module Objectives:

- Demonstrate the essence of communicating.
- Demonstrate that a team's experience of synergy creates breakthrough results.

Sections:

1. The Synergy Game
2. Large Group Debrief

Content:

- The Essence of Communicating

Activity: The Synergy Game

Purpose of the Activity: By working in teams to express and recognize the meaning of words that are key to the environment they collectively want to create, participants learn that the essence of communicating creates engagement and alignment. It is about working together, so that synergy and success can occur.

They'll experience:

- The ability to recognize truth versus illusion.
- The importance of non-verbal communication.
- The meaning of concepts that are key to the environment they collectively want to create.
- Genuine communication, and how it creates the team's synergy.

Module Nine: Taking Ownership for Change

Module Overview

Time: 1 hour

Module Objectives: Participants put everything they have been learning together into taking ownership for change. They:

- Assess where they and their employees, teams and larger organization are in the Model for Change.
- Assess where they and their employees, teams and larger organization are on the Ownership Curve.
- Share their visions and intentions, and align with each other as leaders and sponsors of the larger organizational change.
- Commit to owning change.

Sections:

1. Model for Change Assessment
2. Taking Ownership Assessment
3. Shared Vision and Intention
4. Action Planning

Content:

- Model for Change Assessment
- The Ownership Curve
- Shared Vision and Intention
- Creating a Concrete Measurable Plan

Activity: Assessment and Planning Activity

Purpose of the Activity: Participants assess where they and their employees, co-workers and senior managers are in the process of taking ownership for change. Participants share and align their visions and intentions as managers, and commit to taking action to improve communication and lead others in change.

They'll experience:

- Recognizing gaps between their current state and what is required to move forward.
- Thinking differently about how they can impact desired change.
- Committing to leadership in change and creating a concrete measurable plan.

Sulky Supervisor

Your manager has just called you into a meeting to give a report to a group of account executives about a new initiative. You want to be seen as a valuable worker and are afraid to say no, but you resent being asked at the last minute. It is 5:30 already, and you are late for your son's little league game. You have missed the last five games because of work. You know you will make the best of it and get through the report as quickly as possible. Maybe you can make the last half of the game. Come into the room and begin to address the group on a subject of your choice.

Sulky Supervisor

Your manager has just called you into a meeting to give a report to a group of account executives about a new initiative. You want to be seen as a valuable worker and are afraid to say no, but you resent being asked at the last minute. It is 5:30 already, and you are late for your son's little league game. You have missed the last five games because of work. You know you will make the best of it and get through the report as quickly as possible. Maybe you can make the last half of the game. Come into the room and begin to address the group on a subject of your choice.

The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena. This is followed by a detailed analysis of the data, which shows that the results are consistent with the theoretical predictions. The final section concludes the paper by summarizing the findings and suggesting directions for future research.

The data analysis reveals that the observed trends are not statistically significant at the conventional levels. However, the theoretical model provides a plausible explanation for the observed patterns. The results suggest that the underlying mechanisms are more complex than initially thought, and further research is needed to clarify the relationships between the variables.

In conclusion, the paper highlights the need for a more comprehensive understanding of the underlying mechanisms. The findings provide valuable insights into the complex nature of the phenomena being studied, and the theoretical model offers a promising framework for future research.

Fresh as a Newborn Babe

You are new to the organization and see this position as a great opportunity. You have heard a lot about the company and have a great deal of respect for the vision and mission. You are ready for anything and will support whatever course of action seems sane in the proposed change. A meeting is about to start, where you have been asked to give your views about the upcoming (or ongoing) change. Come into the meeting and give a short presentation to your coworkers about this change initiative.

Fresh as a Newborn Babe

You are new to the organization and see this position as a great opportunity. You have heard a lot about the company and have a great deal of respect for the vision and mission. You are ready for anything and will support whatever course of action seems sane in the proposed change. A meeting is about to start, where you have been asked to give your views about the upcoming (or ongoing) change. Come into the meeting and give a short presentation to your coworkers about this change initiative.

Willing Worker

Your boss has just told you that if you can prove you are capable of a particular new challenge, there is an opening in management available for you. It means taking tremendous risks and you are afraid, but you want to commit one hundred percent. You are about to enter a meeting of the executive team who will decide if you are the right person. Demonstrate both your nervousness and your commitment.

Willing Worker

Your boss has just told you that if you can prove you are capable of a particular new challenge, there is an opening in management available for you. It means taking tremendous risks and you are afraid, but you want to commit one hundred percent. You are about to enter a meeting of the executive team who will decide if you are the right person. Demonstrate both your nervousness and your commitment.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and the role of the accounting department in ensuring the integrity of the financial statements.

2. It then goes on to describe the various methods used to collect and analyze data, including the use of statistical software and the importance of sample size and representativeness.

3. The next section covers the process of identifying and measuring risk, and the role of the risk management department in developing and implementing risk mitigation strategies.

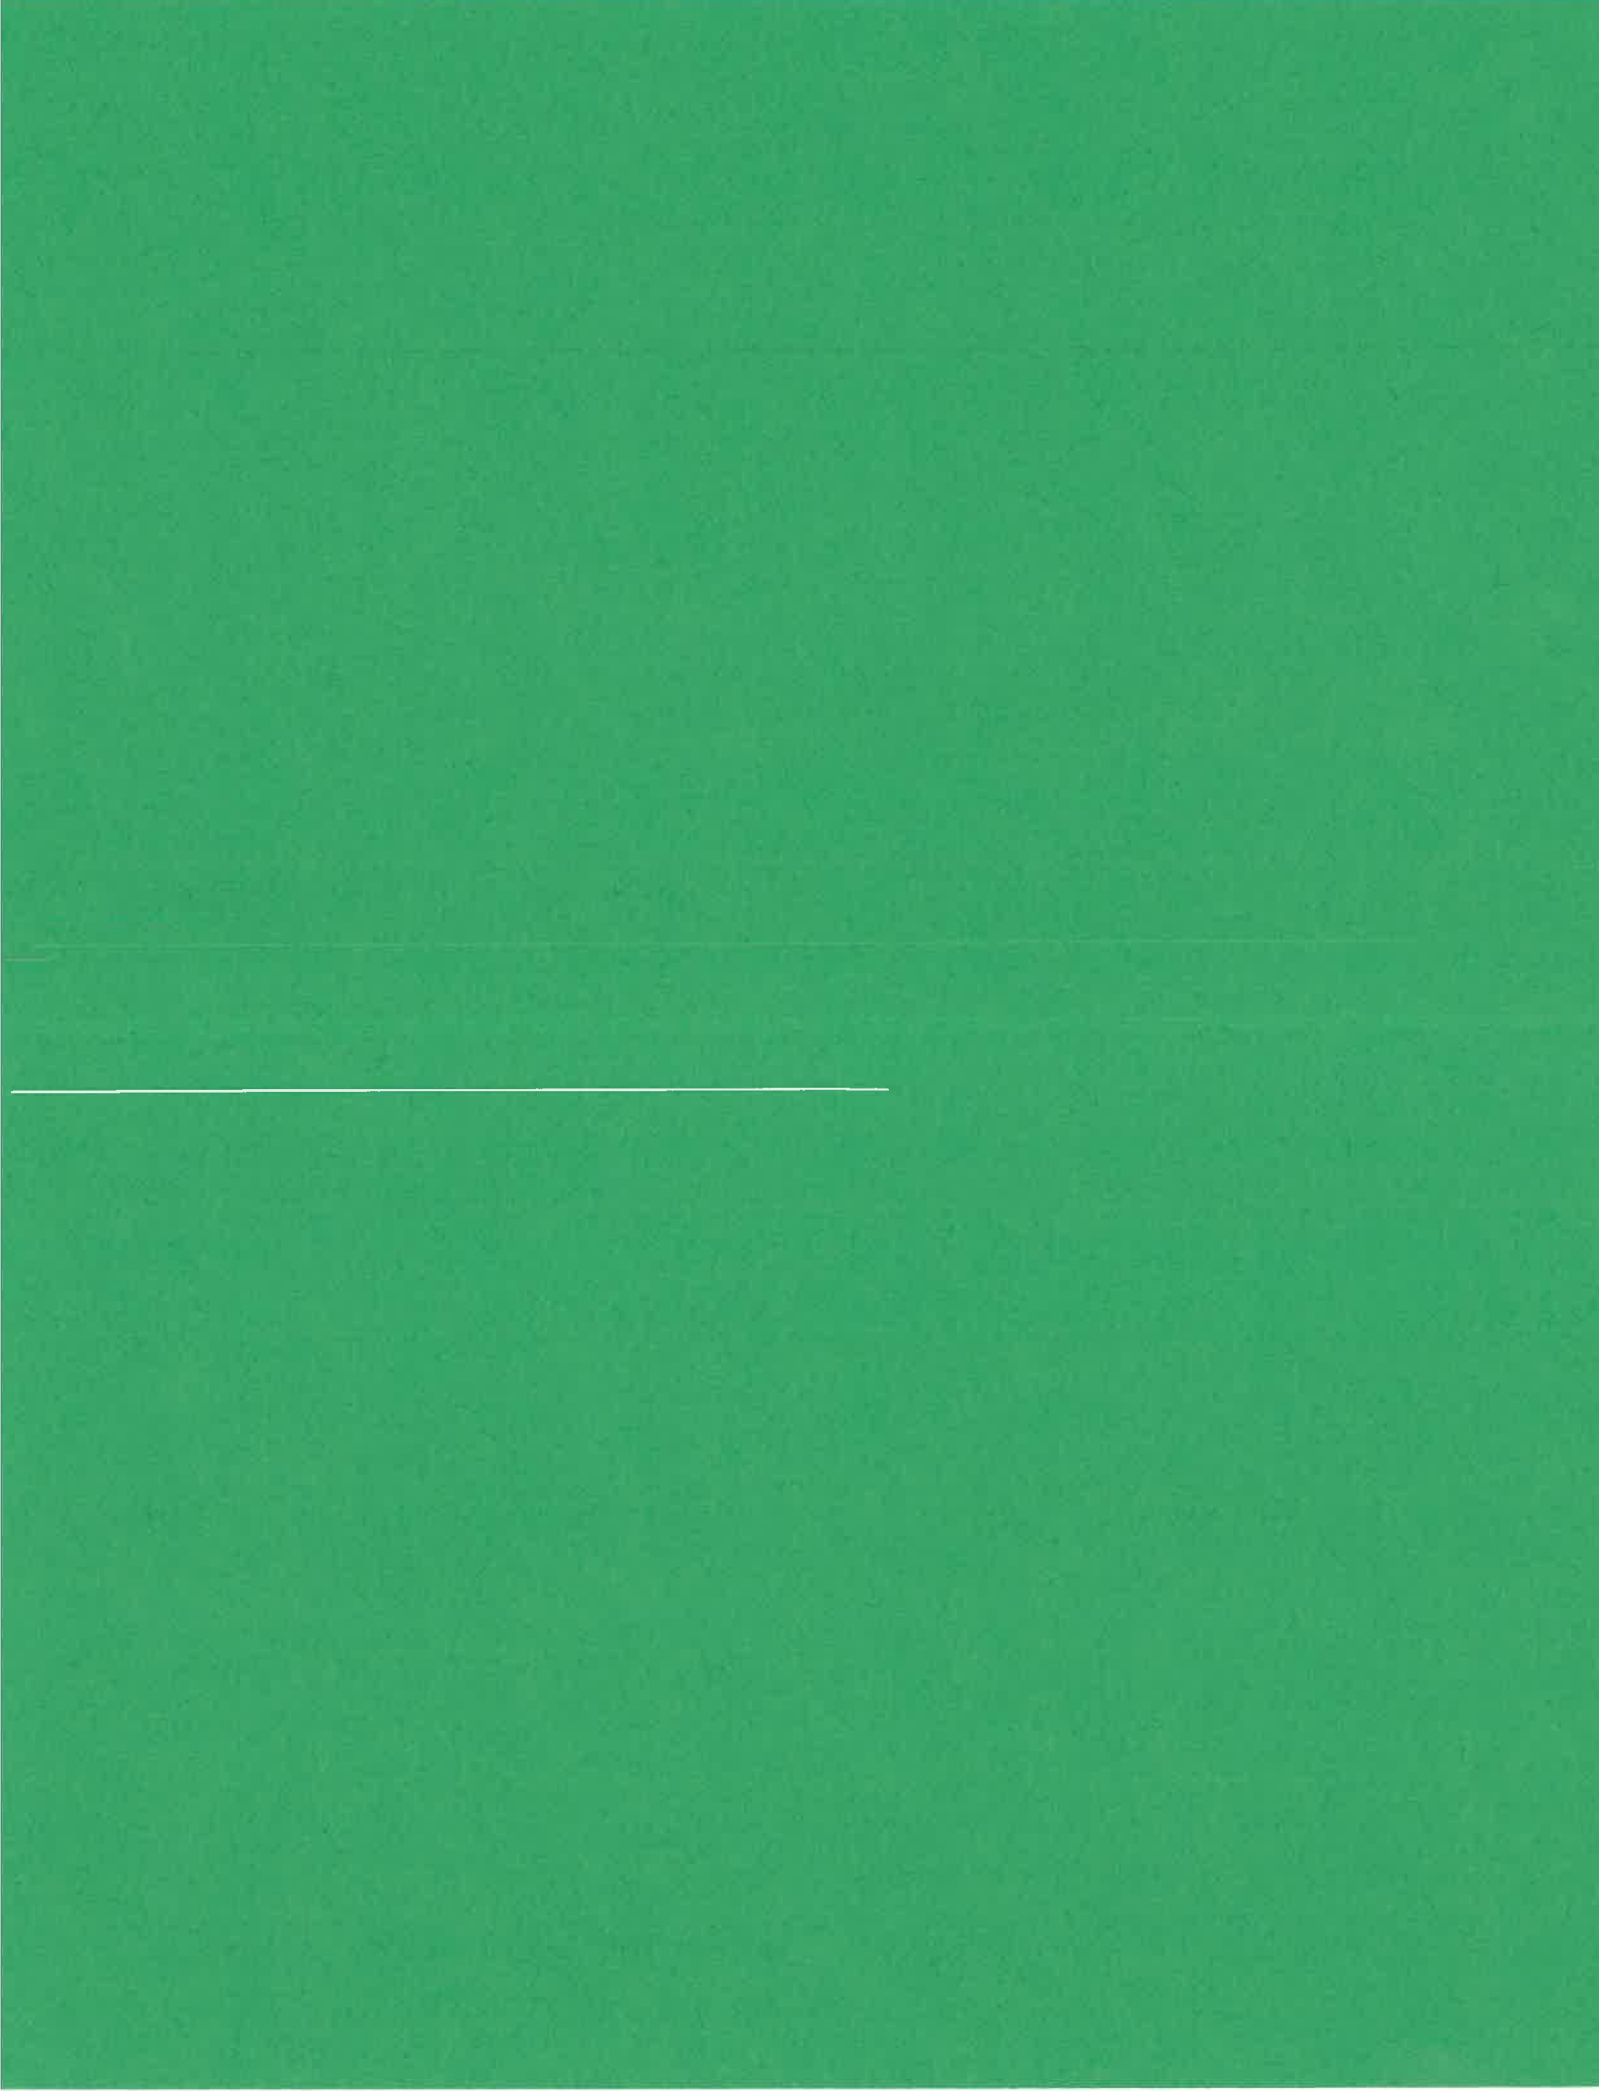

4. Finally, the document concludes with a discussion of the importance of transparency and accountability in the financial reporting process, and the role of the audit committee in overseeing the process.

Wary Worker

Your manager has just offered you your dream job, but has frequently reneged on other offers. You decide not to get your hopes up right away, but rather to "wait and see." You are excited, although determined not to be disappointed. You are about to go into a meeting with that manager and some of his colleagues and must give him some response to his most recent offer. Just in case it is genuine, you don't want to blow it. Go into the meeting and address the offer.

Wary Worker

You are excited, although determined not to be disappointed. You are about to go into a meeting with that manager and some of his colleagues and must give him some response to his most recent offer. Just in case it is genuine, you don't want to blow it. Go into the meeting and address the offer.

Marginal Manager

Another new change initiative has hit the organization. All the top management are very hot for this one. You think that it's ridiculous and that it will blow over if you just pretend to go along with things. You have no intention of actually behaving any differently, however. To cover your lack of buy-in, you act like it was all your idea and the best thing since Kleenex, but it is all hype. You are going into a meeting to introduce the initiative to the first shift workers.
